PRESS RELEASE

Regarding to the great numbers of Corona virus news in Bali province lately, we would like to declare:

1. Until now, in Bali Province we have not identified positive Covid-19 cases. Some cases that were handled with symptoms of fever, cough, cold and had travelled abroad were 29 patients, the laboratory tests of 22 cases were negative Covid-19 meanwhile other 7 cases are waiting for the test results, however, those 7 cases are showing improved clinical symptoms.
2. Bali province has prepared mitigation system (risk reduction) and applied the standards of WHO (World Health Organization), those are:
 - RSUP Sanglah (Public Hospital of Sanglah) with 4 isolation rooms and other standardized room with 18 beds.
 - RSUD Sanjiwani Gianyar with 1 isolation room and other standardized room with 10 beds.
 - RSUD Tabanan with 2 isolation rooms and other standardized room with 7 beds.
3. Recommend RS PTN UNUD (hospital of Udayana University) as isolation hospital if an increasing cases found.
4. I Gusti Ngurah Rai airport has applied screening test in the entrance to monitor the tourists through thermo scanner. Every detected passanger with fever symptom will be evaluated further in a standardized isolation room and will be taken to RSUP Sanglah when needed.
5. We advice the public to not worry, and not panic because the Government of Bali Province has applied proper system with WHO standards.
6. Since Bali is the best tourists destination in the world, the Bali Governor and Vice Governor are very concerned to this global case and they have done inspection to the preparation of RSUP Sanglah and I Gusti Ngurah Rai airport on 3rd March 2020. On the visit site, the Bali Governor and Vice Governor witness the well managed of patients
